

VICKRAM MADHAVAN

Data Analyst | Data Scientist | Machine Learning

Coventry, UK | +44 7883 278066 | vickramadhavan2002@gmail.com | linkedin.com/in/vickram-madhavan | github.com/vickram

PROFESSIONAL SUMMARY

Computer Science postgraduate (MSc, Coventry University) specialising in data analysis and machine learning, with hands-on experience delivering measurable operational improvements in a business setting. Proficient in Python, SQL and BI tools (Power BI, Tableau), with project experience building, evaluating and interpreting predictive models. Seeking a Data Analyst / Data Scientist role where I can turn data into actionable business impact.

CORE SKILLS

- Data & Analytics:** Python (Pandas, NumPy, Scikit-learn), R, SQL, Excel (Pivot Tables, Power Query), Power BI, Tableau
- Machine Learning:** Regression, Classification, Random Forest, SVM, Artificial Neural Networks (TensorFlow / Keras)
- Databases:** MySQL, PostgreSQL, MongoDB
- Tools & Tech:** Git, Figma, Matplotlib, Seaborn
- Operating Systems:** Windows, macOS, Linux

PROJECTS

Dog Bite Incident Prediction — Machine Learning for Big Data

Python, Scikit-learn, Random Forest, SVR, KNN, Data Visualisation

- Processed and analysed 11,688 NYC DOHMH dog-bite records; engineered temporal and demographic features.
- Built and evaluated four ML models; Random Forest delivered the strongest performance for predicting bite frequency.
- Produced visualisations and insights to support public-health risk assessment and resource planning.

Obesity Level Classification Using ANN

TensorFlow / Keras, Python, Data Preprocessing, Multi-Class Classification

- Designed three ANN architectures (baseline, deep, regularised) to classify individuals into seven obesity categories.
- Applied one-hot encoding, MinMax scaling, dropout and L2 regularisation.
- Achieved **87% test accuracy** with the regularised ANN; analysed confusion matrices and learning curves.

PROFESSIONAL EXPERIENCE

Business Operations Executive — MyCaptain, Bangalore, India

Dec 2023 – Mar 2024

- Identified and resolved process gaps that reduced customer-support escalations by **20% within three months**.
- Managed daily operations across 5 departments, ensuring **98% on-time delivery** of tasks and internal KPIs.
- Analysed operational performance metrics to identify inefficiencies and improve workflow processes.

EDUCATION

MSc Computer Science — Coventry University, UK | 2025 – Present

B.Tech Computer Science & Engineering — SRM Institute of Science and Technology, India

2020 – 2024 | CGPA: 8.07 / 10

CERTIFICATIONS

- AWS Academy Cloud Operations
- Oracle Database Foundations
- Blockchain Specialisation — Coursera
- Google Digital Marketing

ACHIEVEMENTS & LEADERSHIP

- Semi-finalist, E-Summit 2023 — IIT Bombay
- Senior Marketing Member, E-Cell SRM
- Financial Lead, CTech Association
- NSS Volunteer — Community Development Programme
